To Whom It May Concern:

I recently refinished the Chabad Educational Campus facility with the WearMax Formula One product, and I can personally attest to the quality of this job. Our facility was built about ten years ago, and over the years we have had to spend several thousand dollars for each polyurethane treatment to the floor, approximately every couple of years. After having applied the WearMax Formula One product, we will not have to budget for the costly maintenance, and it will last for decades. We are saving money on polishing material and labor for buffing. I was drawn to the fact that it is slip and stain resistant, and requires little maintenance. All that is needed is a damp cloth to clean and remove any scuff marks.

We have been enjoying the floor over the last couple months since it was refinished, and we are extremely satisfied with the results. The floor looks brand new and is in pristine condition! In addition, I was very impressed with the superior quality of service provided by the Sandman (Marty Spizman) and his trained A.C.E. installers, and highly recommend their product. It was a pleasure doing business with the Sandman Company.

Please feel free to visit our facility and view our beautiful floor.

Sincerely,

Regional Director of Chabad of San Diego
