## **WearMax™ Passes the Fair Dinkum Aussie Wear Test©**

Global Safe Technologies Australia has recently announced that it has acquired the exclusive distributorship rights for Australia and New Zealand for the WearMax™ space age technology clear anti slip floor coating product range.

Global Safety Surfaces Network members from all over Australia, New Zealand and Canada have recently gathered for an application and certification training in Brisbane which was held by the US based manufacturer.

On the second day of the training after all application training have finished, they decided to give the Aussie Fair Dinkum Wear Test© to the product durability. To do the testing right, they got two identical vinyl pieces, one untreated and one treated with the WearMax™ clear anti slip coating system. A Polyvac polisher with P60 sandpaper was used to Wear the surface to the Max.

To see the UTUBE video of the Fair Dinkum Wear Test© of the untreated vinyl please click on the link below -

<http://www.youtube.com/watch?v=GquVkuNEZic> (1 minute 21 seconds)

Once this test was completed the machine and the sandpaper was transferred over the WearMax treated vinyl surface,

The video clips speak for the product durability.

The WearMax technology is a waterborne, clear, anti slip coating system that prevents you from walking on the floor finish. All WearMax Ceramic finishes are designed to contain 120,000,000 + ceramic particles per square metre.

The WearMax Technology allows these particles to protrude through the final surface. These ceramic particles are what you walk on - not the floor finish.

It provides superior wear resistance, superior scratch resistance excellent slip resistance as well as low maintenance and chemical and stain resistance.

The WearMax Professional range offers a sustainable Pendulum Class X / R10 rated surface for an extended period.

The product is available in 3 different gloss levels; Semi Gloss, Satin and Matt.

# Global Safe Technologies (Australia) Pty Ltd

*Tailored Floor Safety Risk Management, not just Non Slip Floors!*

## *Home Safe, Work Safe, GLOBAL SAFE©*

The product is suitable for indoor use on most substrates, and can also be applied over several types of existing coatings\*\*.

The WearMax product is suitable to a great variety of environments including shopping centres and malls food courts and other common areas, supermarkets, department stores, airports, train stations, public buildings, offices, hospitals, senior care centres, nursing homes as well as lots of others.

WearMax product is not only backed up by the manufacturer's warranty but also Global Safe's industry unique risk FREE management program called FSMP©.\*\*\*

The product will only be available on a supply and install basis as the manufacturer's warranty is only available when accredited applicators do the installation. As Global Safe Technologies services all Australian states and territories, we will be able to assist you wherever your location is. In New Zealand, the local Global Safety Surfaces Network member will be able to assist your requirements both the north as well as the south island.

The WearMax product range will be rolled out over the next couple of months, starting with WearMax Professional.

For further information about the WearMax clear anti slip coating please visit [www.globalsafe.com.au/wearmax.php](http://www.globalsafe.com.au/wearmax.php) .

For further information on the Global Safe Technologies Australia's non slip solutions range of products call us on 1300 668 620 or visit our website [www.globalsafe.com.au/index.php#solution](http://www.globalsafe.com.au/index.php#solution). In New Zealand call us on 06 377 7555 or visit our website [www.globalsafe.co.nz](http://www.globalsafe.co.nz)

\*\*Small sample area testing on substrate / existing coating is required prior to application to ensure full compatibility

\*\*\* The FSMP© is only offered free to commercial clients for a period of 2 years. Please ask your floor safety representative about the details why this program is so valuable to your organization.
